Project

High Pressure Evaporators for Aviation

Location:

Germany

Description

In a close collaboration with Kühner Wärmetauscher GmbH & Co. KG, Evapco Europe AS recently delivered ten high-pressure evaporators for a cutting-edge industrial freezing process.

These evaporators play a key role in the production and development of advanced composite materials—designed specifically for the demanding standards of the aerospace industry.

By supporting this high-tech process, we're proud to contribute to the next generation of innovation in aviation and space exploration.

Features

- Refrigerant R452a
- Hot gas defrosting
- 50 bar design pressure
- Low and Medium Temperature Applications

Benefits

- Space-Efficient Design
- Engineered functionality
- Sustainability
- A1-rated refrigerant
