

Story of the month

Successful Collaboration in The Netherlands with new Major Danish Customer

The Product:

- V-Series dry coolers
- Custom cabling and controls

The Project:

We are proud to share a recent collaboration project between EVAPCO Europe A/S and one of our newest key Danish customers.

This customer, a global leader in sustainable industrial solutions, recently built a state-of-the-art factory in the Netherlands. For this project, they selected EVAPCO's large V-Series dry coolers to deliver reliable and efficient cooling performance.

What made this collaboration stand out was the seamless integration of the customer's own advanced control systems directly into EVAPCO's dry coolers. By combining EVAPCO's high-performance cooling technology with their specialized controls, we achieved:

- Optimized system performance
- Seamless operation and reliability
- Energy-efficient cooling tailored to the factory's needs

The outcome:

A highly successful partnership that demonstrates how collaboration drives innovation and sustainability in industrial manufacturing.

At EVAPCO Europe A/S, we value working closely with our partners to deliver solutions that go beyond equipment — creating real efficiency and long-term benefits for the industry.
